

# Digital Taster Event

Get IT Together held a successful digital taster event at the school on 21st May in support of Adult Learners' Week. Eleven people attended the drop-in session throughout the two hours to meet the local Superfast Cornwall Volunteers as well as a Superfast Project Officer and several school children, who were able to answer questions and help with any computer problems. Our thanks must go to Paul Woolner and the staff and children at the school for all their help which made the event so enjoyable

We still await the installation of broadband into the Parish Hall before we can start the long awaited local training sessions. As soon as this last piece of the jigsaw is in place we can make a start, hopefully before the end of June. The sessions are likely to be weekly for five or six weeks initially and maybe beyond that if anyone wants to continue to develop their computer skills or perhaps pursue a hobby or interest with the help of on-line resources.
